## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. The Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group **Art Unit 2646**.
2. This communication is responsive to the application filed 02/25/2004.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Liu (U. S. Pat. - 6,490,363).

Regarding claim 1, Liu discloses a speaker apparatus, comprising: a dome diaphragm (26) equipped with a voice coil and having a concave cross section protruding towards the voice coil; an edge (11) provided on the outer periphery of the dome diaphragm, having a concave cross section protruding towards the voice coil and supporting the dome diaphragm on a frame; and a magnetic circuit (22) forming a magnetic gap containing the voice coil as claimed.

Regarding claims 3-4, Liu further discloses the speaker apparatus, wherein the dome diaphragm and the edge are formed by mutually independent members and different materials (Fig. 3).

Art Unit: 26436

Regarding claim 5, Liu further discloses the speaker apparatus, wherein said magnetic circuit is an inner magnetic type (Fig. 4) as claimed.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Liu (U. S. Pat. - 6,490,363).

Regarding claim 2, Liu does not clearly teach in details of the dimension of the edge as claimed. Since Liu does not specially restrict the dimension of the edge, it therefore would have been obvious to one skilled in the art at the time the invention was made to be motivated to suitably alter the dimension of the edge, such as such as the outer diameter of the edge is 1.5 times the inner diameter of the edge as an alternate choice, in order to customize the speaker for obtaining certain acoustic characteristics for different application.

### ***Conclusion***
